PRODUCT OVERVIEW

SMT PRODUCTION SUPPLIES & STENCIL PRINTING ACCESSORIES

**JNJ...YOUR COMPLETE SOURCE FOR CONSUMABLE SUPPLIES
ESSENTIAL TO MAINTAINING THE HIGHEST QUALITY STANDARDS IN
ASSEMBLY AND MANUFACTURING**

Electronic & Industrial
Supplies & Cleaning
Products

JNJ manufactures high quality screen and stencil printing accessories and cleaning products. We are well known for our SMT production supplies for all OEM stencil printing machines, custom and production machining services.

Our printer components line features both JNJ designed and OEM specific squeegee blades and holders. We are recognized experts in under-stencil wiping rolls. Our OEM and custom SmartRolls® fit every printer worldwide. For cleaning, maintenance, re-work, and polishing, our SmartWipes® line of wipers is offered in saturated wipes and flat dry wipes.

GlobalTech products are formulated for the rigorous cleaning requirements of any workplace.

All of JNJ products are made in the USA. Our commitment is not only to provide quality products, but to make them available for quick delivery from our factory or from one of our many local, national and international distributors. JNJ's knowledgeable manufacturers representatives can provide customer's with local support. They will work with you directly or in concert with our distributor sales force to assist you with your needs.

JNJ's Global-Tech® division provides environmentally responsible, earth friendly chemicals

RoHS & REACH COMPLIANCE

All JNJ products are RoHS and REACH compliant, and do not contain any of the chemicals that have been classified as hazardous substances. In compliance with REACH Legislation, our products have been pre-registered in the EU. REACH stands for "Registration, Evaluation, Authorization and Restriction of Chemicals." Being an environmentally conscious company since our inception, we did not have to alter or discontinue any of our products to attain compliance.

SQUEEGEES for Lead-Free and Leaded Manufacturing — Realizing that some companies are exempt from RoHS restrictions, and must continue to manufacture with tin/lead solder, JNJ offers squeegee holders that are color coded, gold for use on lead lines and green for lead-free lines. We also etch our metal blades with the words "lead-free" for use on lead-free manufacturing lines. Color coding the squeegee holders and etching the blades provides simple and effective identification for machine operators.

Gold for use with Tin-Lead

Green for Lead-Free

SPECIAL POINTS OF INTEREST:

- More Choices To Help Maximize Performance
- Environmentally Safe & RoHS Compliant Products
- JNJ Designed & OEM Specific Squeegee Blades & Holders and Understencil Rolls
- Fast Delivery Worldwide
